

Cricket Player Performance Tracking Application : CRICKSTATS

User Story:

As a Salesforce Admin, I want to create a comprehensive player performance tracking application within Salesforce to capture and analyze detailed match-by-match information of cricket players. This application will include custom objects such as Player and Match Performance with carefully defined fields and relationships to ensure data integrity and accessibility. By leveraging master-detail and lookup relationships, the application will enable robust tracking of individual and team performances, facilitate insightful reporting and analytics, and support the overall management of player statistics, thereby enhancing strategic decision-making and player development initiatives.

1. INTRODUCTION

1.1 Project Overview :

CRICKSTATS is a Salesforce-based application designed to track, manage, and analyze cricket players' performance on a match-by-match basis. The system uses custom objects, relationships, dashboards, and automation tools to provide structured performance insights.

It enables coaches, analysts, and administrators to record player statistics, generate reports, and support strategic decision-making.

1.2 Purpose :

The main purpose of this project is:

To digitize player performance records

To improve accuracy and accessibility of cricket statistics

To provide real-time analytics

To support player development and team planning

To automate data management using Salesforce

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A cricket team coach	Track player performance across matches	I cannot get accurate statistics easily	Data is stored in different files and formats	Frustrated and unsure about team selection
PS-2	A team manager	Maintain complete player records	It takes too much time to update and verify data	Most records are maintained manually	Stressed and inefficient
PS-3	A sports analyst	Analyze player trends and generate reports	I face difficulty in comparing performances	There is no centralized analytics system	Confused and dissatisfied

Problem Statements

		
A cricket team coach	A team manager	A sports analyst
PS-1	PS-2	PS-3
 A cricket team coach	 A team manager	 A sports analyst
I am: Track player performance across matches	I am: Maintain complete player records	I am: Analyze player trends and generate reports
But: I cannot get accurate statistics easily	But: It takes too much time to update and verify data	But: I face difficulty in comparing performances
Because: Data is stored in different files and formats	Because: Most records are maintained manually	Because: There is no centralized analytics system
 Frustrated and unsure about team selection	 Frustrated and unsure about team selection	 Confused and dissatisfied.

2.2 Empathy Map Canvas

Target Users

- Team Managers
- Coaches
- Analysts
- Salesforce Admins

Empathy Analysis

- | Aspect | Description |
|---------------|-------------------------------------|
| Think & Feel: | Need accurate data, better insights |
| Hear: | Feedback from management |
| See: | Multiple data sources |
| Say & Do: | Collect statistics manually |

- **Pain:** Data errors, delays
- **Gain:** Faster decisions, automation

2.3 Brainstorming

Brainstormed Ideas

- Web-based player management system
- Mobile statistics tracker
- Salesforce-integrated CRM
- AI-based performance prediction
- Dashboard-based analytics

Selected Idea: Salesforce-based performance tracking platform (CRICKSTATS)

3. REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Journey Stages:

- Login
- Enter Player Data
- Record Match Performance
- Generate Reports
- Analyze Results
- Decision Making

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	Player Registration
FR-2	Match Performance Entry
FR-3	Dashboard Generation
FR-4	Report Creation
FR-5	Flow Automation

Non-Functional Requirements (NFRs) – CRICKSTATS

NFR-1: Usability

The system should be easy to understand and use by coaches, managers, analysts, and admins without requiring technical training.

Requirements

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-read dashboards
- Minimal learning curve

Examples:

- A new coach should be able to:
- Log in
- Enter match data
- View player reports
- within a few minutes without special training.

Example: The Salesforce Lightning interface provides drag-and-drop dashboards and user-friendly forms.

NFR-2: Security

The system must protect sensitive player data from unauthorized access.

Requirements

- Role-based access control
- Secure authentication
- Encrypted data storage
- Regular backups

Examples:

- Coaches can view player statistics
- Managers can edit records
- Analysts can generate reports
- Only admins can modify system settings

Example: Salesforce Profiles and Permission Sets restrict access to confidential information.

NFR-3: Reliability

The system should function correctly without failure and store data accurately.

Requirements

- No data loss
- Automatic backups
- Error handling
- System stability

Example:

If a manager enters match statistics and loses internet connection, the data should be saved automatically when reconnected.

Salesforce cloud backup ensures recovery in case of system failure.

NFR-4: Performance

The system should respond quickly and handle large volumes of data efficiently.

Requirements

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal response time

Example:

When an analyst generates a performance report for 100+ players, the report should load within 2–3 seconds.

Optimized Salesforce queries and caching improve response speed.

NFR-5: Availability

The system should be accessible whenever users need it.

Requirements

- 24/7 system availability
- Minimal downtime
- Cloud-based access
- Disaster recovery

Example:

Coaches should be able to access CRICKSTATS even during tournaments at night or on weekends.

Salesforce provides high uptime with cloud hosting.

NFR-6: Scalability

The system should support increasing numbers of users, players, and records.

Requirements

- Handle growing datasets
- Support more teams and leagues
- Expand storage capacity
- Maintain performance under load

Example:

If CRICKSTATS is extended from one team to 50 teams, the system should still perform smoothly.

Salesforce cloud infrastructure automatically scales storage and processing.

3.3 Data Flow Diagram

Data Flow

User → Salesforce UI → Player Object → Match Performance → Reports → Dashboard

3.4 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Analytics	Reports & Dashboards
Automation	Salesforce Flows
Backend	Salesforce Objects
Database	Salesforce Cloud

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The CRICKSTATS system effectively addresses the key challenges faced in traditional cricket performance management. Earlier, most player and match data were maintained using manual records, which were time-consuming and prone to errors. This issue has been resolved by implementing an automated system through Salesforce, which ensures accurate and efficient data entry and management. The problem of data loss, caused by improper storage and lack of backups, is overcome by using secure cloud storage that safely stores all information and allows easy retrieval. Poor analysis of player performance, due to scattered and unorganized data, is addressed through interactive dashboards that present clear visual insights and reports. Additionally, delays in accessing performance information and generating reports are eliminated by providing real-time reporting features, enabling users to make faster and more informed decisions. Thus, CRICKSTATS successfully bridges the gap between existing problems and modern technological solutions.

Problem-Solution Fit

4.2 Proposed Solution

Description

CRICKSTATS provides:

- Custom objects (Player, Match Performance)
- Master-detail relationships
- Roll-up summaries
- Lightning App
- Automated flows
- Interactive dashboards

Key Features

- Centralized database
- Live statistics
- Secure access

- Scalable design
- Easy reporting

4.3 Solution Architecture

Architecture Layers

- Presentation Layer (Lightning UI)
- Application Layer (Flows, Logic)
- Data Layer (Objects)
- Analytics Layer (Reports)

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Agile-based execution
- Object creation → automation → reporting
- Sprint-wise development

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the CRICKSTATS system.	1	High	Member1
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Player and Match Performance objects so that player and match data can be stored systematically.	3	High	Member2
Sprint-2	Navigation	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage records within the application.	3	High	Member3
Sprint-2	UI Design	USN-4	As a coach, I want a dedicated Lightning App so that all performance tracking features are accessible from one dashboard.	3	High	Member4
Sprint-2	Data Structure	USN-5	As an admin, I want to create player and match fields so that complete performance details can be captured accurately.	5	Medium	Member1
Sprint-2	Data Structure	USN-6	As a user, I want customized page layouts so that only relevant fields are displayed during data entry.	5	High	Member2
Sprint-2	Automation	USN-7	As a system, I want to validate player and match inputs so that incorrect data entries are prevented.	3	High	Member4
Sprint-3	Automation	USN-8	As a system, I want automated flows to update player statistics so that performance data remains accurate.	5	High	Member1

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022		
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022		
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022		

6. Project Development Phase:

Project Flow

Milestone 1 : Creation of developer account

Milestone 2 : Object Creation

Milestone 3 : Tabs

Milestone 4 : The Lightning App

Milestone 5 : Fields & Relationships

Milestone 6 : Roll-up Summary

Milestone 7 : Flows

Implementation

Milestone 1 - Salesforce developer account creation :

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :

- 1) First name & Last name
- 2) Email
- 3) Role : Developer
- 4) Company : College or Company Name
- 5) Country : India
- 6) Postal Code : pin code
- 7) Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in that format :

username@organization.com

Click on sign me up after filling these.

Activity 2: Account Activation :

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account.

3. Give a password and answer a security question and click on change password.

The screenshot displays the "Change Your Password" form. It prompts the user to "Enter a new password for lead@sb.oom." and lists requirements: 8 characters, 1 letter, and 1 number. The form includes several input fields, all of which are highlighted with a red rectangle: "New Password" (with a "Good" status), "Confirm New Password" (with a "Match" status), "Security Question" (a dropdown menu showing "In what city were you born?"), and "Answer" (containing the text "asdfghjkl"). A blue "Change Password" button is located at the bottom of the form.

4. Then you will redirect to your salesforce setup page.

Milestone 2 - Object Creation

Activity 1 : Player Object

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3. On the Object Manager page, click Create | Custom Object.

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
 - **Label** : Player
 - **Plural Label** : Players
 - Enter Record Name Label and Format
Record Name : Player Name
Data Type : Text
 - **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
 - **Search Status** : check the box for Allow Search.
 - Save

Activity 2 : Match Performance Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
 - **Label** : Match Performance
 - **Plural Label** : Match Performances
 - Enter Record Name Label and Format
Record Name : Customer Account Name
Data Type : Text
 - **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
 - **Search Status** : check the box for Allow Search.
 - Save.

Milestone 3 - Tabs

Activity 1 : Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)
2. Select Object(Player) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Match Performances.

Milestone 4 - The Lightning App

Activity 1 : Create a lightning app

1. Go to setup page → search “app manager” in quick find → select “app manager” → click on New lightning App.

2. Fill the app name in app details and branding as follow

App Name : CRICKSTATS

Developer Name : Auto Populates

Add image optional (if you want to give any image you can otherwise not mandatory) - Add Primary color Hex or leave it to default.

Then click Next.

3. In App options

Navigation style : Standard navigation

Setup experience : setup

Supporters form factors : Desktop and phone

Then click Next

4. In Utility items

Utility Bar alignment : Default

Then click Next.

5. Navigation items

Select the created Custom Objects and required standard objects

- Players
- Match Performances
- Reports
- Dashboards

Navigation Items

Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename navigation items available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.

The screenshot shows the 'Navigation Items' configuration interface. It is divided into two main panels: 'Available Items' on the left and 'Selected Items' on the right. The 'Available Items' panel has a search bar with the text 'Dash' and a list containing 'Dashboards', which is highlighted with a red box. Below the list is a right-pointing arrow button, also highlighted with a red box. The 'Selected Items' panel contains a list with 'Players', 'Match Performances', and 'Reports', all of which are highlighted with a red box. To the right of this list are up and down arrow buttons. At the bottom of the interface are 'Cancel' and 'Save' buttons, with the 'Save' button highlighted by a red box.

6. To Add User Profiles : System Administrator

The screenshot shows the 'New Lightning App' configuration screen, specifically the 'User Profiles' section. The title 'New Lightning App' is at the top. Below it, the section is titled 'User Profiles' with the instruction 'Choose the user profiles that can access this app.' There are two panels: 'Available Profiles' on the left and 'Selected Profiles' on the right. The 'Available Profiles' panel has a search bar with 'System administrator' and a list containing 'System administrator', which is highlighted with a red box. A red arrow points from this box to the 'Selected Profiles' panel. The 'Selected Profiles' panel contains a list with 'System Administrator'. Below the list is a right-pointing arrow button, highlighted with a red box, and a left-pointing arrow button below it. A red arrow points from this right-pointing button to the 'Available Profiles' panel. At the bottom of the screen is a progress bar with four checkmarks and one circle. To the right of the progress bar is a 'Save & Finish' button, highlighted with a red box, with a red arrow pointing towards it.

7. Click Save & Finish.

Milestone 5 : Fields & Relationships

Activity 1 : Create Custom fields for Player object

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : **Player**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.
6. Next, choose a data type as Text. Choosing a data type helps you format the field input.

7. Click on next.
8. Data Type : **Text**
Field Label: Player Name
Field Name : Auto Populates
Length : 50
Click on Next → Next → Save and new.

9. Repeat the Same steps for remaining fields

- Data Type : **Text**
Field Label: Player Number
Field Name : Auto Populates
Length : 3
Click on Next → Next → Save and new.
- Data Type : **Rich Text Area**
Field Label : Profile Picture
Field Name : Auto Populates
Click on Next → Next → Save and new.
- Data Type : **Date**
Field Label : Date of Birth

- Data Type : **Formula**
Field Label : AVG Score
Field Name : Auto Populates
Formula Return : **Number**
Formula : IF(
Matches_Played__c > 0,
Total_Runs__c / Matches_Played__c ,
0
)

The screenshot shows the Salesforce formula editor interface. At the top, there are two tabs: 'Simple Formula' and 'Advanced Formula'. Below the tabs, there are two buttons: 'Insert Field' and 'Insert Operator'. The main text area contains the formula: 'AVG Score (Number) = IF (Matches_Played__c > 0, Total_Runs__c / Matches_Played__c , 0)'. At the bottom, there is a 'Check Syntax' button and a green message: 'No syntax errors in merge fields or functions. (Compiled size: 130 characters)'.

Click on Next → Next → Save & New.

- Data Type : **Lookup Relationship**
Related To : Match Performance
Field Label : Match Performance
Field Name : Auto Populates
Click on Next → Next → Save.

Activity 2 : Create Custom fields for Match Performance object.

1. Data Type : **Text**
Field Label: Match Performance Name
Field Name : Auto Populates
Length : 80
Click on Next → Next → Save and new.
2. Data Type : **Checkbox**
Field Label: Player of the Match

Field Name : Auto Populates
Click on Next → Next → Save and new.

3. Data Type : **Picklist**

Field Label: Match Result

Field Name : Auto Populates

Value : Enter value, with each value separated by a new line

Field Name : Auto Populates
Click on Next → Next → Save and new.
14. Data Type : **Master - Detail Relationship**
Related To : Player
Field Label : Player
Field Name : Auto Populates
Click on Next → Next → Save.

Milestone 6 : Roll-up Summary

Activity 1 : Create Roll-up Summary for Player object.

Note :- Roll-up Summary can only be created on parent object in Master- Detail Relationship.

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : **Player**

- From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
- Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist. Click Next,
- Choose a data type as **Roll-up Summary**. Click Next.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce Lightning user interface to verify the correct functioning of all implemented features in the CRICKSTATS system. These include record creation for Player and Match Performance objects; validation rule checks for mandatory fields, score limits, and input constraints; verification of record type behavior for Domestic and International match categories; and flow execution for automatic updating of player statistics and data consistency. The functionality of roll-up summary fields was also tested to ensure accurate calculation of total runs, wickets, averages, and performance metrics.

In addition, system performance was evaluated by monitoring response time during data entry, report generation, and dashboard loading. The application was tested under multiple user interactions to ensure stable performance without delays. Screenshots of generated reports and interactive dashboards were documented to confirm accurate data visualization, real-time updates, and reliable performance tracking. These testing

activities ensured that the CRICKSTATS platform met both functional and performance requirements and was ready for deployment.

NOTE : Enter some records in the Player Object and Match Performance Object to get the results.

1. Select one Team from the Picklist and Click **Next**.

The screenshot shows the CRICKSTATS application interface. The top navigation bar includes 'Home', 'Players', and 'Match Performances'. The main content area displays a table titled 'players flow' with the following data:

Profile Picture	Player Name	Total Runs	AVG Score	Nationality	Batting Style	Bowling Style	Matches Played	Number of 50's	Number of 100's
	Virat Kohli	746	49.73	India	Right-Handed	Right-Arm Medium	15	5	1

The table is titled 'Showing 1 of 1 item'. At the bottom right, there are 'Previous' and 'Finish' buttons.

The screenshot shows the CRICKSTATS application interface. The top navigation bar includes 'Home', 'Players', and 'Match Performances'. The main content area displays a table titled 'players flow' with the following data:

Profile Picture	Player Name	Total Runs	AVG Score	Nationality	Batting Style	Bowling Style	Matches Played	Number of 50's	Number of 100's
	Shreyas Iyer	58	58	India	Right-Handed	Right-Arm Spin	1	1	0
	Rahmanullah Gurbaz	62	31	Afghanistan	Right-Handed	Right-Arm Medium	2	0	0

The table is titled 'Showing 2 of 2 items'. At the bottom right, there are 'Previous' and 'Finish' buttons.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized system
- Real-time analytics
- Secure platform
- Scalable design
- Reduced manual work

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

9. Conclusion:

CRICKSTATS successfully implements a cloud-based cricket performance tracking system using Salesforce. The system automates data management, improves reporting accuracy, and supports informed decision-making.

The project demonstrates practical application of SDLC, Agile methodology, and CRM-based development.

10. FUTURE SCOPE

- Mobile application integration
- AI-based performance prediction

- Video analysis integration
- Player ranking system
- Public statistics portal
- Multi-league support

11. APPENDIX

- Salesforce Objects & Fields
- Manual match statistics
- Flow Configurations

Thank You
